

#### **Connector Table**

#### Cable: P1 CN1

Wire Application	Wire	Color	Description
Leals Dalays		Blue White	(N.O.)DC24V1Amp
Lock Relay	2	Purple White	(N.C.)DC24V1Amp
Common-COM-Point	3	White	(COM)DC24V1Amp
Door Contact	4	Orange	Negative Trigger Input
Exit Switch	5	Purple	Negative Trigger Input
Alarm Relay		Gray	Transistor Output Max. 12V/100mA
Alaminelay	6	Giay	(Open Collector Active Low)
Power	7	Thick Red	DC 12V
rowei	8	Thick Black	DC 0V

#### Cable: P2 CN2

Wire Application	Wire	Color	Description			
DI1	1	White	Reserved			
Beeper	2	Pink	Beeper Output 5V/100mA, Low			
LED	3	Yellow	Red LED Output 5V/20mA, Max			
LED	4	Brown	Green LED Output 5V/20mA, Max			
Door Output	5	Blue White	Transistor Output Max. 12V/100mA			
	5	Dide Mulle	(Open Collector Active Low)			
Wingond	6	Thin Green	Wiegand DAT: 0 Input			
Wiegand	7	Thin Blue	Wiegand DAT: 1 Input			
WG Door Contact	8	Orange	Negative Trigger Input			
WG Exit Switch	9	Purple	Negative Trigger Input			

Cable: P3 CN	13							
Wire Application	Wire	Color	Description					
	1							
	2							
	3	Orange White	Net - TX+					
	4	Orange	Net - TX-					
TCP/IP Output	5	Green White	Net - RX+					
	6	Germ	Net - RX-					
	7							
Cable: P4 CN4								
Wire Application	Wire	Color	Description					
RS-485 for Lift	1	Thick Green	RS-485(B-)					
Controller	2	Thick Blue	RS-485(A+)					
Cable: P5 CN	۷5							
Wire Application	Wire	Color	Description					
Aut Tauran	1	Red	N.C.					
Anti-Tamper Switch	2	Orange	СОМ					
Switch	3	Yellow	N.O.					
Cable: P6 CN	٧6							
Wire Application	Wire	Color	Description					
Power	1	Red	DC 12V Output					
Security trigger signal	2	Purple	Security trigger signal Output					
Arming	3	Red White	Arming Output					
Duress	4	Yellow White	Duress Output					
Cable: P3 CN	19/C	N11						
Wire Application	Wire	Color	Description					
	1	Blue	CLK					
	2	Red	DC 5V					
TTL Output	3	Orange	RX					
	4	White	TE					
	5	Yellow	TX					
	6	Black	DC 0V

#### Notice

1.Tubing: The communication wires and power line should NOT be bound in the same conduit or tubing.

2.Wire selection: Use AWG 22-24 Shielded Twist Pair to avoid star wiring.

**3.Power supply:** Don't equip controller and lock with the same power supply. The power for controller may be unstable when the lock is activating, that may make the controller malfunction.

The standard installation: Door relay and lock use the same power supply, and controller use independent power supply.

#### Adding and Deleting Tag Add Single Tag or Random tags Input \* 123456 # (or Master Code) $\rightarrow$ 19 \* UUUUU \* 00001 # $\rightarrow$ Present the tag(s) with Controller (single tag or random numbered cards one by one) $\rightarrow$ Done [e.g.] 2 readom cards with user addresses No. 100 and No. 101: Access programming mode $\rightarrow$ 19 \* 00100 \* 00001 # $\rightarrow$ Present the tags one by one $\rightarrow$ Done Add the Sequential tags Input \* 123456 # (or Master Code) - 19 \* UUUUU \* QQQQQ # - Present the tags (Present the tag with the lowest number first.) - OK [e.g.] User Address NO.101 to NO.120 have 20 pcs of sequential tags:(62312~62332): Access programming mode $\rightarrow$ 19 \* 00101 \* 00120 # $\rightarrow$ Close Tag into RF Area(only use the tag NO.62312) $\rightarrow$ OK Delete a Single Tag Input \*123456 # (or Master Code) $\rightarrow$ 10 \*SSSSS 9 EEEE # **Tag Information** [e.g.] Delete User Address: 00058 Access programming mode $\rightarrow$ 10 \* 00058 9 00058 # ිධ Delete a batch of Tags 0000848795 000012:62362 < -CARD CODE Input \* 123456 #) (or Master Code) $\rightarrow$ 10 \* SSSSS 9 EEEEE #) [e.g.] Delete User Address: 00101~00245 SITE CODE SITE CODE Access programming mode $\rightarrow$ 10 \* 00101 9 00245 # Delete All Tags Input \* 123456 # (or Master Code) $\rightarrow$ 29 \* 29 \* #Programming A. Command List (By WG Keyboa	ard)					
Function	Command	Exposition				
Entering programming mode	* PPPPP #	PPPPP: Master Code, (Default value: 123456)				
Exiting programming mode	* #					
Exiting programming mode and enabling all device into arming status.	* * #	Including AR-331(EF), WG Reader				
Enabling each device into arming status.	* * U #	U=Enable target unit (0=AR-331(EF) , 1=WG Reader)				
		NNN=Node ID,(001~254)				
Node ID setting	00 * NNN * MMM * AAA #	MMM=AR-331(EF) Door Number,(001~255)				
		AAA=WG Reader Door Number,(001~255)				
		default value = 192.168.1.127				
		CCCCCCCCCCC = 192168001127				
IP Address assign (Must power reset)		If set to 000.000.000 will enable DHCP otherwise				
n Address assign (must power reset)		will disable DHCP				
	01 * 1 * 255255255000 #	Netmask				
	01 * 2 * 192168001254 #	Gateway assign				
		U=Enable target unit (0=AR-331(EF) , 1=WG Reader)				
Door relay time setting	02 * U * TTT #	TTT=Door relay time				
Door relay time setting		000 (Output constantly)				
		001~600=1-600 Sec. ; 601~609=0.1~0.9Sec.				
		TTT=Alarm relay time ; 000 (Output constantly)				
Alarm relay time setting	03 * TTT #	001~600=1~600 Sec.				
Arming delay time setting	05 * TTT #	Base on second, range: 001~255				
Alarm delay time setting	06 * TTT #	Base on second, range: 001~255				
Master card catting	07 ± 00000 ± EEEEE #	SSSSS-EEEEE=00000~15999				
Master card setting	07 * SSSSS * EEEEE #	SSSSS= starting user address; EEEEE= ending user address				
		M=AR-331(EF); W=WG Reader (0=disable; 1=enable)				
		NN=16 sets of auto-open zone (Range: 00~15)				
		HHMMhhmm=staring time to ending time				
Auto-open zone setting	08 * MW * NN * HHMMhhmm *	(e.g.: 08301200=08:30 to 12:00)				
	7123456H <u>#</u>	7123456: 7 days of week -Sun/Mon/Tue/Wed/Thu/Fri/Sat
